

Bespoke Elements

Above: A used sample is an ideal way to spec up an element and see if we can manufacture it if part numbers are not available.

At Sterling Filtration Ltd we can manufacture your filters to your specification. If you require air, hydraulic oil or basket strainers in cellulose, glass fibre or mesh that are unusual, obsolete or OE only we can manufacture a like for like replica.

In order to identify if this service is suitable for your needs we require one or more of the following items:

- A filter sample
- An accurate drawing with dimensions & operating specification
- An OEM part number
