

Air Brake Dryers

Air dryer cartridges are the best possible protection for pneumatic braking systems. In the field of safety, brakes are amongst the most important components of a vehicle and dry, clean air is particularly important for the pneumatic braking systems on trucks and buses in order to protect the system from corrosion and malfunctions. Our range of air dryer filters solves this problem.

The advantages of the air dryer are:

- Highest possible resistance to pressure and pulsation
- Durable rigidity to vibration
- Premium quality desiccant with the highest possible drying performance, abrasion resistance, and water-resistance.
- Improved oil separation
- High quality sealing materials
- Great corrosion protection
- Best possible braking reliability

Maintaining at your normal service intervals is vitally important to the safety of you and your vehicles.
