

Powercore™ Elements

Above P60 8533 Primary Element

Above: P60 8665 Secondary Element

Donaldson Powercore™ offers much more filtration in a smaller housing unit allowing system optimisation at affordable prices. Elements are metal free in their construction making them lightweight and the compact nature can free up space in your work area or engine. Powercore elements are non-metal and can be incinerated and are environmentally friendly. They are available from Sterling Filtration Ltd.

Powercore™ Standard Product Line

MAIN ELEMENT	SAFETY ELEMENT	APPLICATION	INSTALLATION
