RoHS Statement.

Sterling Filtration Ltd doesn't handle, supply, store or manufacture electronic/electrical items that contain lead and other undesirable elements and Sterling Filtration Ltd supports efforts to eradicate the use of hazardous, harmful and toxic elements in the manufacture of all products, not just their use in electronics.

All obsolete electrical equipment is recycled as required by law.

All products stored and supplied by Sterling Filtration do not contain hazardous materials.

The Company carries out assessments on all hazardous substances we encounter as required by the COSHH (Control of Substances Hazardous to Health Regulations) 1999. All assessments will be documented and records kept and maintained. Reassessment will be undertaken as necessary, in accordance with COSHH regulations.
