

Parker Racor Elements and Housings

Above: Racor elements R12T (10 Micron), R12P (30 Micron) and R12S (2 Micron) used for fuel/water separation.

Over the last 30 years Racor has become one of the leading names in marine and automotive fuel filtration and water separation. With advanced fuel filtration laboratories across the globe Racor will continue leading the market in advanced fuel filtration technology for years to come.

At Sterling Filtration Ltd we have a large range of stock availability of original Racor style fuel elements at competitive prices. All elements, as shown above, come with the necessary gasket seals.
